# From Bottled Delivery to Pure Water on Tap

How the Reyes family eliminated bottled water entirely with an Aqua Pura home system.

## Project Overview

The Reyes household relied on three 5-gallon bottled deliveries every week to avoid hard, chlorinated tap water. After installing an Aqua Pura 7-stage Advanced Filtration System paired with the Smart Hub, the family now drinks pure, mineralized water directly from the tap with no plastic waste and a fraction of the cost.

## Key Outcomes

**\$1,680**

Cost savings / year

**1,560**

Plastic bottles avoided

**99.9%**

Contaminant removal

## Before & After

### BEFORE

- Chlorine taste and odor in tap water
- Weekly 5-gallon bottle deliveries
- Estimated 1,560 plastic bottles / year
- Annual hydration cost: \$2,040

### AFTER (with Aqua Pura)

- Mineralized, great-tasting tap water
- Smart filter-life tracking via app
- Zero single-use plastic
- Annual cost: \$360 (filters only)

## Solution Deployed

Aqua Pura Advanced Filtration System (7-stage with mineralization) installed under the kitchen sink, paired with the Smart Water Hub for live water quality monitoring, leak detection, and automatic filter replenishment. Total installation time: 90 minutes.

## Client Testimonial

*"We replaced bottled delivery entirely. The water tastes amazing and the app makes maintenance effortless. We should have done this years ago."*

— Sarah Reyes, Homeowner — Phoenix, AZ
